

Chaise longue.

The Shibusa series also includes a lounge chair.

The natural materials featured in the Eres collection can be used outdoors, but not be directly exposed to the elements, and require some extra attention and care than traditional outdoor furniture. These products need to be used under a stable cover and to be protected overnight. It is also recommended that they are sheltered indoors for seasonal protection. Some of the materials will mature and will change appearance and colour over time. And this will naturally happen.

Structure: turned bamboo, treated with water-based products that do not affect the wood colour and the naturalness of the surface. Plastic spacers.

Seat and backrest: tatami panel in igusa.

Notes:

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
