Uso e Manutenzione:

Per una protezione supplementare si consiglia l'utilizzo delle apposite coperture nella stagione invernale, alla sera, o in caso di piogge frequenti.

La cuscineria in dacron deve essere immediatamente protetta in caso di pioggia per evitare formazioni di muffa.

Lavare la cuscineria in tessuto con un ciclo normale ad una temperatura massima di 40 °C.

Non lavare a secco.

Non asciugare il tessuto con apparecchi elettrici e non stirare.

Per la manutenzione e la protezione del teak, si consiglia di utilizzare il nostro "Teak care kit", appositamente studiato per la pulizia delle superfici in teak.

Use and Maintenance:

For dacron padding cushions in rainy conditions a dry area should be provided to prevent the formation of mold.

You can safely launder both fabric in a washing machine.

Initial water temperature should not exceed 40°C. Do not dry clean. Do not use electrical dryer and do not iron.

Use our "Teak care kit" for cleaning and maintenance of teak surfaces.
