

KUMO

Kumo, the Japanese word for cloud, is a light, tautly designed and contemporary seating island that will be previewed at Maison&Objet, introducing the new season's outdoor trends. This playful and airy sofa concept comes with two modules that can be used in different outdoor and indoor settings, both privately and publicly, large or small: intimately, on a terrace or by the pool, but also in the reception area of hotels or in public buildings. Kumo invites you to create a personalised outdoor cocoon: its concept with inter-changeable covers comes in different shapes and sizes, decorative pillows, seat and back cushions which you can choose from the extensive Manutti fabrics range. The armrests and back supports are easily adjustable and can be moved around, transforming the Kumo cloud into a plush sofa or stylish lounge chair or cool footrest. Mixing and matching was never this easy!
