# Ribes

SOFAS

*Antonio Citterio*

## Description

Ribes is the new modular seating system designed by Antonio Citterio with a focus on versatility, customisation, colour and research on materials. Sofas, central and end elements, chaise longue and ottomans all come in a huge variety of shapes and sizes that lend themselves to being arranged in an outdoor space according to personal taste thanks to the exceptional versatility of the modular components and the availability of a vast range of covers and finishes. The starting point is a futon base with flexible glass fibre slats resting on an aluminium frame to which two types of armrest or backrest can be attached as desired: one with a polypropylene fibre interlacing, the other with a roller cushion. On top are seat cushions intended as comfortable mattresses to stretch out on and several shapes of back and armrest cushion, all containing a new upholstery giving Ribes a particularly lived-in and soft look. Colour comes into play in the painted frames in shades of anthracite, sage and clay. These same tones are then picked up in the back and arm supports combining the colour sage and clay with a natural coloured interlacing and anthracite to one in

a matching shade, and the same for the brackets of the roller sections. The textile choice is also extensive and colourful with designs that have been inspired by traditional fabrics collected during numerous trips to South America, reinterpreted and redesigned using very clear colour schemes that still leave a wide choice of different combinations allowing maximum customisation. The seat, back and arm cushions can be covered as desired in wide or narrow-striped, dotted or single-colour material, all in various shades that coordinate with each other. There is also a choice of profile colours in natural, blue and red tones. Because it is so versatile, Ribes can also be reconfigured over time by adding new elements as well as altering the functional use of existing ones. By substituting, adding or varying the position of the back and arm, a sommier can turn into a vis-à-vis sofa, a sofa become an island and a corner seating plan transform into a comfortable bed. Ribes means transformation and is especially suited to those areas that are neither in-nor outside: verandas, shady patios, under a loggia or on a covered terrace allowing a fluid approach to the open spaces in the home.

---

## Technical information

### Frame

die-cast aluminium and extrusions with polyester powder painting

### Back and roller upholstery

ecogreen (polyethylene and polyester blend), cover in water repellent polyester fibre

### Seat upholstery

shaped polyurethane, ecogreen (polyethylene and polyester blend), cover in water repellent polyester fibre

### Interlacing

polypropylene fibre braid

### Seat slats

glass fibre

### Ferrules

thermoplastic material

### Waterproof cover cloth

PES fabric coated on one side in PU

### Cover

fabric in limited categories (with profile)
