

RANDOM BOX (Designer Neuland Industriedesign)

* Drawer compartment

A bookcase with compartments closed by doors made of medium-density wood fibreboards, in micro goffered white lacquer; uprights and shelves in thickness 6mm; doors in thickness 12mm.

The back is made from white melamine-coated board (thickness 10 mm).

Open compartments, or closed by doors in standard size, and one drawer compartment. The large dims of the compartments and the new depth of 35cm allow a functional use of the available space.

The shelves are fit into the backs through concealed dovetail slots.

By flanking more units, also with Random Cabinet or Random, large-sized configurations of strong impact can be created.

Adjustable feet to 15 mm.

For safety reasons, the unit **must** be fixed to the wall.

It is instead suggested not to fix flanked units together horizontally.

Dims

Height 216.3 cm and length 81.6 cm. Depth 35 cm.
