

TOLBIAC

Design by
Grégoire de Lafforest

Description

Tolbiac introduces a 3rd dimension into the world of shelving units: with one side shaped like stairs, it forms a triangular shape which evolves to the point where the shelves regain their straight shape at the 5th level. The front edge is worked in a helix shape to follow the slope of the side panel and bring purity to the overall piece. These 'stairs' may be positioned to the left or right of the unit.

This bay, which can be used on its own, may be complemented with additional columns in widths 75 and 131, which may be added in modular fashion.

Available in two versions: shelving unit H 215 and shelving unit H 260; the latter may be cut in height, down to a minimum of 220 cm.

Available in natural or black-stained oak veneer.

Shelves mounted invisibly in lateral grooves.

Must be fixed to a wall.

IMPORTANT : the 'stairs' play an aesthetic role and also that of a shelf - but they should on no account be used as stairs by an adult wishing to access the top of the shelving unit.
