

## Dorothy

X 689 Giuseppe lasparra

The metal backrest of the armchair is made with a laser-cut frame and by metal pipes assembled individually with a handmade procedure, and chrome plated in the finishes: Black Rose gold, bright shaded brown, bright light gold, matt Champagne gold, bright chrome, bright black chrome, matt satined bronze, bright pink gold, matt pink gold.

The load-bearing structure is cold-moulded in foam with an iron insert, using a designated mould. The upholstery on the structure is available exclusively in hot-glued leather, applied by hand. The seat is in wood and polyurethane foam with three layers of density, with non-removable leather or fabric upholstery. The backrest cushion is in sterilised goose down, covered in removable leather or fabric.
