

FLAX

Design by
Philippe Nigro

Description

Comfortable, easy on the eye and very easy to accommodate - occupying a square-shaped space of around 75 cm² - it will fit into interiors of all styles. Slipped into a contemporary setting, the parallel glimpses it provides of the knowledge and skills of times past and the living aspect of natural walnut combine to bring a touch of warmth. Armchair structures are generally functional carcasses; in the case of FLAX, though, that which is habitually concealed becomes not only visible, but actually the principal aesthetic asset of the piece.

Technical Specifications

CONSTRUCTION

Integral structure and feet in solid American walnut.

COMFORT

Seat cushion with inset steel springs and high resilience polyurethane Bultex foam 36 kg/m³ - 3.2 kPa clad in Bultex foam and 200 g/m² polyester quilting. Back cushion with integral lumbar cushion filled with new duck feathers (90 % feathers/10 % down) H 88 mm with compartmented liner and core in polyurethane foam 32 kg/m³ - 2.8 kPa.

The structure of the high-backed armchair is identical to that of the low-backed version. The only difference is the height of the back cushion.

MAKING-UP

Baguette stitching on the seat cushion ; regular stitching on the back cushion. Removable covers (NB except in the case of seats in microfibres or leather).
