

Armchair.

The Vespucci series also includes two- and three-seater sofa.

The natural materials featured in the Eres collection can be used outdoors, but not be directly exposed to the elements, and require some extra attention and care than traditional outdoor furniture. These products need to be used under a stable cover and to be protected overnight. It is also recommended that they are sheltered indoors for seasonal protection. Some of the materials will mature and will change appearance and colour over time. And this will naturally happen.

Structure: stainless steel AISI 304 varnished in avorio or grafite colour in combination with the colour of the details in sassafras wood.

Uprights, front profile of the seat and feet: natural sassafras wood, plastic spacers.

Removable structural cover: Spago fabric, obtained by weaving a linen twine.

Seat cushion:

independent and with removable cover, available in two versions

- natural latex, paineira vegetable fiber and woolen felt, insert with elastic steel springs, fixed covering in 100% cotton fabric
- polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

Back cushion:

independent and with removable cover, available in two versions

- natural latex, paineira vegetable fiber and woolen felt, fixed covering in 100% cotton fabric
- polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

Armrest cushion:

independent and with removable cover, available in two versions

- natural latex, paineira vegetable fiber and woolen felt, fixed covering in 100% cotton fabric
- polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

Upholstery:

for all cushions available in

- Lino Grezzo
- Lino Délavé
- Canapa Délavé

Notes:

The entirely natural padding of the seat and back cushions guarantees the same comfort of a traditional synthetic padding.

The paineira vegetable fiber is water repellent, non-allergenic and completely biodegradable.

Sassafras wood is treated with water-based products that limit the absorption of liquids and greasy substances, but do not protect the wood against mould, fungus and parasites.

The change in colour and the possible appearance of superficial splits are the typical effect of the natural evolution of the wood over time.

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
