

Design

Gordon Guillaumier

Description

Armchair for outdoor use

Structure

Teak frame and slats. Teak wood contains a natural oily resin which makes it extremely resistant to weather, temperature, parasite attacks and insects. The exposure outdoor creates a 1/2 mm-thick oxidation patina on the wood surface which favors its discoloration to a silver-grey color; this change does not affect its original characteristics in any way. The grey patina can be avoided or removed with the correct maintenance.

Cushion

Standard or hydro-draining. Cushion is attached to the frame with elastic straps.

Weight

Structure 9 kg
Cushion: 0,7 kg

Storage cover

Available

Finishes

Maintenance

Teak

- In humid conditions, teak may release some reddish oil, which can cause stains on the surface. For normal cleaning, use a soft cloth (not in microfiber), fresh water and SUNDECK SOAP.
- use SUNDECK WOOD OIL LIGHT, a nutrient and protective oil, on the new product to avoid the superficial oxidation.
- use GREY OFF every 2/3 years to remove the grey patina due to the oxidation of the surface. After the treatment with GREY OFF, wash the furniture with water and SUNDECK SOAP and oil it with SUNDECK WOOD OIL LIGHT.
- In case of deep spots hard to clean with SUNDECK

SOAP, it is recommended to sand the surface uniformly before using GREY-OFF; in any case, do not use GREY-OFF more than once a year.
- Always avoid abrasive products or aggressive chemical solvents.
