

DESCRIPTION

The CTR collection is characterised by a tube in powdercoated stainless steel that follows the outline of the chair in one continuous line. The curves of the tube are round while bent in an angle which requires great mastery. With a lightness of touch the open weave of the backrest appears to float unsuspected around the seat. The weave is made of weather-resistant Tricord and gives extra support to the back. The seat is upholstered with a water-repellent cushion which can be removed.

MATERIALS

- Frame: 304 stainless steel, powdercoated with an ultra durable polyester coating
- Back: plaited Tricord (polyolefin)

CUSHIONS

The seat cushions are made of dryfoam and therefore water-permeable. The back cushions are water-repellent. The fillings of these cushions have a cover in a laminated, water-repellent polypropylene material which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra covering. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding. Fabrics available in category D, E & F.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

MAINTENANCE

Frame

Clean the aluminium frame with tap water and a PH neutral soap. For stubborn stains, use Aluminium Cleaner. We advise to use Metal Protector twice a year which applies an invisible film and protects the aluminium against the adhesion of dirt.

D9952
Aluminium
Cleaner

D9930
Metal Protector Teflon®
(spray that lays an invisible dirt-repellent film)

Back

Before use, we recommend to treat the Tricord weaving with Textile Protector which applies an invisible dirt and water repellent film. The weaving can be cleaned with clear tap water and a ph-neutral detergent or Synthetics Super Cleaner.
