
Flat.C

WALLSYSTEMS

Antonio Citterio

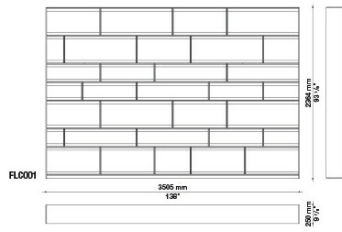

Description

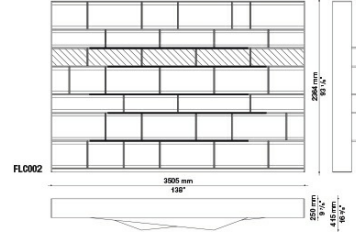

As we all have size requirements in our houses, we need furnishings that despite their size can be positioned in areas of limited space. This is where the concept for Flat.C comes from. Designed to house books and a television as well as all hi-fi accessories in the smallest amount of space possible, it also provides a convenient solution for electrical wiring and arranging the wires in cableways. Flat.C is only 25 cm in depth: the thickness of the shelves and sides has been extremely reduced, and there are no visibly joined parts.

B&B Italia reserves the right to make technological and aesthetic improvements to its models, including changes to the sizes and materials, without notice. The technical drawings do not define the details of the product. The measurements shown are indicative and may undergo changes. In particular, the dimensions relevant to the padded parts are subject to usage tolerances over time caused by the normal adjustment of the padding. For the specific information, please contact the dealer closest to you.
