

design: Marco Acerbis, 2006

A deep tinted mirror is raised from the ground to recreate the mystic reflection effect of perfectly still water. Everything around is mildly reflected on the surface, supported by a conical shell that mysteriously disappears in the shadow. Structure matt lacquered in the colours: white, black, slate grey, night blue, dark red. Reflecting top finishes: silver mirror, lacquered white or black, or OXID slate grey, night blue, dark red. OXID is a special "pirolite" glass with particular deep reflecting effects. Easy to move thanks to hidden wheels in the base.

FINISHES

Base: white, black, slate grey, night blue, dark red. Top lacquered glass white or black, Silver mirror, Oxid slate grey, Oxid night blue, Oxid dark red.

TECHNICAL CHARACTERISTICS

- TOP: glass tops 4 mm silvered, white or black float glass tops or Oxid glass with grey, blue and red varnish with reflecting effect. MDF safety support (19 mm thick).
- BASE: high density polyurethane panel, protected by texturised matt polyurethane varnish.
