

SETTE MAGIE LOW TABLES

1989 - Lella & Massimo Vignelli

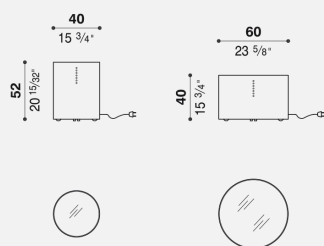

Description

SETTE MAGIE collection is one of the best expressions of the project approach by Massimo & Lella Vignelli: on the one hand a careful and visually powerful design of its lines, on the other a strong connection with Italian handicraft which results in an intellectually challenging, unique and timeless product. The element which combines the design of all the items in SETTE MAGIE collection is the cylindrical metal structure, updated with metalized "diamond finish" coating, painting in three contemporary nuances instead of the original gold and silver leaf coating and micaceous iron painting, characterized by the distinctive graphic sign of the sequence of seven bright holes. SETTE MAGIE low tables are available in two different heights and widths, with hidden wheels inside the bases and with Stopsol silver or bronze stratified glass top backlit by an LED lamp. The top magically changes depending on whether the light is on or off: the totally mirroring surface with dark and deep colour actually becomes a white and luminous screen, which sheds light on the items placed there, as well as spreading a pleasant suffused glow throughout the room. The luminous tables can be freely placed in the middle of the room or moved wirelessly, thanks to an internal rechargeable battery.

Finishings

Low tables with cylindrical metal base in two heights and widths. Base with "diamond finish" coating in light nickel, bronze tobacco, titanium colours. Top in laminated stopsol glass, silver or bronze, back lit by an LED lamp placed inside, powered by a rechargeable battery. Easy to move thanks to hidden wheels in the base.

Technical info
