Piero Lissoni

## Descrizione

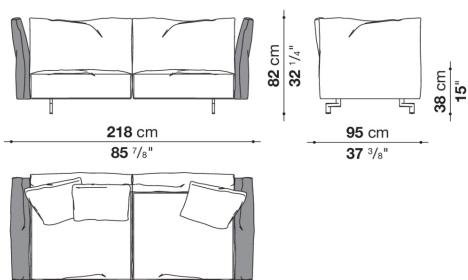

Dambo è il terzo sistema di divani che Piero Lissoni disegna per B&B Italia. È un sistema modulare composto da pentagoni irregolari e moduli rettangolari, che affianca forme geometriche più complesse a elementi lineari prestandosi a molteplici composizioni e ambienti. Gli elementi a base pentagonale, dalle dimensioni importanti e dalla grande flessibilità, sono utilizzabili come penisole in combinazione con altri elementi o come sedute a sé stanti. Sono volumi accoglienti, da posizionare a centro stanza, per comporre soluzioni angolari o per creare composizioni personalizzate. Gli schienali alti e avvolgenti sono un inno alle forme organiche del mondo della botanica. I braccioli sembrano petali che, grazie ad uno snodo, possono essere abbassati e regolati a piacere. I cinque elementi di base, caratterizzati da una morbidezza accogliente e da un'ergonomicità soffice, consentono di creare le più svariate configurazioni. Le diverse geometrie sono in armonia tra loro, informali ma funzionali e versatili. L'intera serie vanta un sistema costruttivo schiumato a freddo, con imbottiture di ultima generazione. Schienali e braccioli vengono innestati alla struttura di base mediante un sistema di aggancio a baionetta. I piedini, dal disegno discreto ed essenziale, si presentano con un'elegante sezione ovale. Emergono leggerezza e versatilità, in linea con i dettami di lifestyle contemporanei, che sempre più fondono spazi living e ambienti di lavoro domestici. Dambo si propone così ad un vasto pubblico, fedele alla tradizione B&B Italia, ma con lo sguardo rivolto al modern living.
