**Additional specification:** The marble being a natural product, any visible "imperfections" as shades, grains more or less intense, veinings, irregularities on the surface, little holes, or colour differences are an intrinsic characteristic of this material and cannot be considered a flaw. Each slab of marble used is different from the other and cannot be chosen by customer. For this reason, catalogue pictures are only indicative and the final product may differ from them. These aspects give value and make each product unique.
