

Sahara is a modular rug for exterior and interior environments created with braids, which are sewn together lengthwise.

The extremities of each braid are finished with a fringe which is always featured on the short side of the rug.

Only one colour can be chosen.

The width of the braids may vary between 16-18 cm. The dimension of the short side is determined by the multiple of the braids and will often vary.

The textile structure of this rug is free: an intense stepping may cause a variation of the rug's dimension.
